

Company Presentation

Enter Our World of Services

The Cairon Group was founded in mid 2007 by a group of industry experts with great experience in system and solution in the wireless telecommunications industry, particularly in the field of SIM cards, scratch cards and fulfillment. Cairon is designed to be the CHOICE partner for the global Mobile Network Operator.

With a strong insight into our customers' needs and requirements and a comprehensive network of suppliers and industry partners, Cairon is committed to provide the best possible service and deliver quality products to meet the most stringent requirements of our customers.

Our Mission / Our Vision

Cairon will deliver revenue generating solutions to our customers.

Being innovative while delivering the best in products.

We are taking care of our environmental responsibility:

- Reducing our environmental impact and carbon footprint by using green products.
- We are only working with partners/suppliers who are taking care in the same way our customers and we do.
- Together with our employees we are promoting a strong awareness of environmental issues and improve our performance continuously.

Innovations are driving our permanent improving processes.

Customer's satisfaction through our constantly presence and our obligation to service and reliability.

Our acting is orientated to long term relations.

Business Model

Focussing on providing:

- quality products
- on time
- and beyond our customer's expectations.

Outsourcing all physical production steps, but still keeping control of all security and quality related processes and products.

Key components of supply chain are controlled in-house:

- project management
- procurement of key components
- lead time control
- reporting tools

Multiple sources for each product.

Advantages

Production and Operation Flexibility

- quick response towards the customer
- „1-face-to-the-customer” policy
- low hierarchy level = high flexibility level

„Unlimited” Production Capacity

- manufacturing redundancy by having a variety of partners
- multiple sources for all products

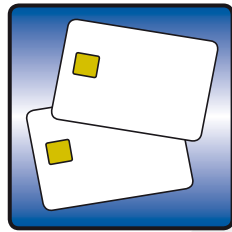

Cost Optimisation with Effective Resource Management

- lower operating costs
- lower overhead
- shorter operational times

Security and Quality Control
