

Usage and liability advice for Micro - SIM Adapter

We produce the Micro-SIM adapter according to our pending patent. The Micro-SIM adapter can be used in all the mobile handsets that have been constructed in accordance to the use of this adapter (particularly in respect of their standard size).

But we cannot check the compatibility of our Micro-SIM adapter with all and every handset marketed so far nor with the handsets still to be marketed.

We therefore advise all our partners to test if our Micro-SIM adapter will work without restriction in the mobile handsets they offer to their customers.

We will assume no liability if the use of our standard and faultless Micro-SIM adapter causes any damages.

Please do not use the Micro – SIM adapter in your mobile phone without the Micro – SIM card. This can cause some difficulties when removing the adapter out of the mobile phone.
